May 19th, 2025

Update for May

We only have six laptops left to install. These are for office staff who chose to wait for summer to get their new ones. It's been a busy three months changing out over 100 laptops. This big project is now mostly done. So far, it seems the staff are really enjoying their new laptops.

We have replaced the security camera at the football field. I was able to purchase a good quality used one on eBay. Between Dave Geisenhof and myself, we finished the installation on May 13th. We are hoping to set up a camera feed to show still images throughout the summer on the progress of the turf project.

I've been working with the Secondary office staff on the move to the Elementary this summer. We've been making plans to set up offices in just a few weeks when we need to be out of the building. Since we are on one network, it should be quite a simple transition for them.

We will also be temporarily expanding the Wifi in places around the Elementary school building to accommodate all the activities we will have here this summer. We were lucky to have a donation of used access points from another school as they recently upgraded their hardware.

Summer work is getting started, and we already have many tasks on our summer to-do list. Besides keeping up with the construction project and what they need for the HVAC system's network, several big projects are planned. These include moving the entire server system to new hardware, updating the camera system software, upgrading the phone system software, getting two computer labs ready, and checking all the old laptops so they can be used again in classrooms, plus much more.
