

OSBA Model Sample Policy

Code: JHCD
Adopted:

Medications**/*

The district recognizes administering a medication to a student and/or permitting a student to administer a medication to themselves, may be necessary to allow the student to attend school. Therefore, the district allows medication, including injectable medications, to be administered to a student by designated personnel and the administration of medication by a student to themselves without assistance from designated personnel, subject to criteria established by the district and in accordance with Oregon law.

The district shall designate personnel authorized to administer medications to students. Medications, including injectable medications, may be administered by designated district personnel as part of a formal delegation by a registered nurse. Annual training shall be provided to designated personnel in accordance with law. The training will align with the ODE Medication Administration Training and include discussion of this policy, procedures and materials, including but not limited to, procedures outlined in administrative regulation JHCD-AR - Medications.

When a licensed health care professional is not immediately available, trained personnel designated by the district may administer epinephrine, glucagon, treatment for adrenal insufficiency, or another medication to a student as prescribed and/or as otherwise allowed by Oregon law.

A current first-aid/CPR/AED card is required for designated personnel.

The district reserves the right to reject a request for administration of medication at school, either by district personnel or student self-administration, if the medication is not necessary for the student to remain in school.

The district may revoke permission given to a student to self-administer medication if the student does not responsibly self-administer the medication or abuses the use of the medication, as determined by district personnel.

Medications will be handled, stored, monitored, disposed of and records maintained in accordance with law and established district procedures governing the administration of prescription or nonprescription medications to students, including procedures for the disposal of sharps and glass.

A process shall be established by which, upon parent or guardian written request, a backup medication is kept at a reasonably, secure location in the student's classroom as provided by state law.

A premeasured dose of epinephrine may be administered by trained, designated personnel to any student or other individual on district premises who the person believes in good faith is experiencing a severe allergic reaction, regardless of whether the student or individual has a prescription for epinephrine.

This policy shall not prohibit, in any way, the administration of recognized first aid to a student by district employees in accordance with established state law, Board policy and administrative regulation.

The superintendent shall develop administrative regulations to meet the requirements of law and the implementation of this policy.
