Fail	Public School FY 20 (2019-2020) ADMINISTRATION AND GENERAL BUILDING REQUIREMENTS	26 - Carbon Monoxide Detection
Inspector Comments: ROOM 130 - PROVIDE CO DETECTION. (105 ILCS 5/10-20.57, 41 Ill. Adm. Code 111.230) All schools must have carbon monoxide detection located within 20 feet of a carbon monoxide emitting device. Schools designed before January 1, 2016 may use carbon monoxide alarms powered by batteries. For public schools designed on or after January 1, 2016, any carbon monoxide alarm installed must be monitored by any required fire alarm system and must be permanently powered by the building's electrical system. Alarms or detectors must be in operating condition and be inspected annually. A school is exempt from the requirements of this requirement if it does not have or is not close to any sources of carbon monoxide. A school must require plans, protocols, and procedures in response to the activation of a carbon monoxide alarm or carbon monoxide detection system. The local school boards are responsible for this program and further clarification for compliance should be taken up with them. OSFM will assist with appropriateness of equipment but will not discuss installation location of CO devices. It is recommended that the local fire department and the school board be contacted regarding protocols, procedures, and response plans for CO activation.		

This inspection report has been reviewed by the Regional Administrator and will serve as your final report for this inspection and replaces any previous reports.
