
#5120.2.1
Head Injuries

The Board of Education recognizes that concussions and head injuries are commonly reported injuries of children and adolescents who participate in sports and other recreational activities. The Board acknowledges the risk of catastrophic injuries or deaths are significant when a concussion or head injury is not properly evaluated and managed.

Commencing July 1, 2010, and each school year thereafter, any coach of intramural or interscholastic athletics employed by the District shall complete an initial training course, approved by the State Board of Education, regarding concussions which are a type of brain injury prior to commencing the coaching assignment for the season. Such training course shall include, but not be limited to (1) the recognition of the signs and symptoms of a concussion; (2) the means of obtaining proper medical treatment for a person suspected of having a concussion; (3) the nature and risk of concussions, including the danger of continuing to engage in athletic activity after sustaining a concussion; and (4) the proper method of allowing a student athlete who has sustained a concussion to return to athletic activity.

Each school year any coach who has completed the initial training course regarding concussions shall annually review current and relevant information, developed or approved by the State Board of Education, regarding concussions prior to the start of the coaching assignment. This annual review is not required in any year the coach is required to complete a refresher course. Beginning July 1, 2015, and each school year thereafter, a coach must complete an approved refresher course not later than five years after the initial training course in order to maintain his/her coaching permit and to coach in the District.
