## **Technology Report**

We have been in touch with STS Recycle to pick up our old hardware out of the baseball shed. They take everything and delete the data if any, detail the serial numbers and inventory tags, and recycle the electrical parts.

We are planning end of year procedures including changes to staff and student files and programs, hardware inventory, and graduation preps. While preparing for these, we are also monitoring the network and preparing for all the online tests happening in April and early May.

Our renewals for our anti-virus and Verkada camera and sensor licenses are due this month, and we will be purchasing some backup equipment for the network if needed.
