

# Site Report – Chignik Bay – March, 2022

To: Superintendent Kasie Luke  
and LPSD School Board Members

From: Stephanie Canning, Headteacher

## Outstanding Activities and Events

This month the students participated in lots of aeronautics lessons. First, they met with a pilot from Civil Air Patrol to discuss questions and concerns they had related to flying and being a pilot. They loved it as most of my students would like to get their pilot's license one day. Then, we also put together our remote operated aircraft and have started learning how to fly these vehicles. We also used finger rockets and footballs to understand how spacecrafts are designed and work. My students were unsuccessful catching leprechauns this past St. Patrick's day but they sure did enjoy seeing what was left behind.

## Personnel

Personnel continue to make suggestions to improve the Bay's school.

## Standards Based System/Curriculum Progress

Secondary students have been working with one-on-one tutors from Outschool and Itutor in order to help them progress proficiently through their standards. Elementary students have also been working one-on-

<p>one with tutors to provide additional interventions. Students have begun end of levels for writing and reading.</p>
<p><b>Technology Progress</b></p>
<p>Tech has been working all semester to solve our tutor issues, hopefully next year the kinks will be worked out. We also have not been having a good semester with our student laptops. Several have had to switch to loner laptops for the remainder of the year until these issues can be resolved.</p>
<p><b>Facility Update</b></p>
<p>Tim and Carl really came out to do their best and were just met by challenge after challenge. I appreciate their ability to stay positive and cheerful even when things are not going right. They were able to fix the boiler and make other small repairs. They will be back to repair a leak in the plumbing system and will be relying on local maintenance to rebuild our teacher housing porches.</p>
<p><b>LSAC Activity</b></p>
<p>We had our most recent LSAC meeting this past Tuesday where they discussed end of the year topics and had the Title 1 Annual meeting.</p>
<p><b>Volunteer Report</b></p>
<p>I would like to thank the Chignik Bay Tribal Council for working with me to help acquire materials for our culture week that will take place in April. I would also like to thank some local community members who have been working to help me gut areas in the school in order to prepare for the new library.</p>
<p><b>Professional Development</b></p>
<p>My special education aide has finished all his training and is preparing to take his Praxis the first week in April. While my other aide is technically just a sub, I have been training her in our reach for reading curriculum in hopes she will be able to take over some of that teaching next year if we remain with only one teacher again. Both aides participated and completed the literacy classes provided by Amber. I myself am finishing my Spring semester for both my Masters and my EDL Masters Certification. I will continue to take classes for both programs over the summer. I am also in full swing with the literacy course I am taking through DEED, in hopes to better understand how to teach reading.</p>
<p><b>Pupil Attendance</b></p>
<p>While attendance is not usually a problem for the Bay, we have had an increase in tardiness. I did have one student out for several weeks but that was an unusual circumstance and I worked with the parents to make sure the child was not falling behind in her education.</p>
<p><b>Student and Staff Safety</b></p>
<p>The threat of covid seems to dwindle down everyday here as we don't have many travelers. I anticipate a change in our community mandates because of this. Students and Staff are well versed in both fire and earthquake safety.</p>
<p><b>Subsistence Calendar</b></p>
<p>After our most recent LSAC meeting, families and community members are excited to see vacation days being used to create four-day school weeks next March, rather than a week-long spring break. Thoughtful consideration was made when determining these breaks for next year.</p>
<p><b>Other</b></p>
<p>As always the threat of being not open is imminent and we just pray for a good outcome at the next Board meeting.</p>
