Site Report – Perryville School – January, 2018	
To: Superintendent Ty Mase	From: Name, Position
and LPSD School Board Members	Joe Ward – Perryville School Princiap
,	
Outstanding Activities and Events	
On Dec. 16 th , the Perryville Robotics team competed in a virtual competition against teams from all across the state. They were able to get the robot to perform two tasks. They also presented their solution for making sea water into potable water by using a filter made of carbon nanotubes. The team learned about nanotubes from an article on its possibilities found on the internet. While the team did not make it to the state competition, the represented Perryville School very well. All participants received a medal from First Lego League. The team plans to continue to work with the robot in order to program it to complete many of the other tasks for a presentation to parents in April.	
The lower elementary, upper elementary and secondary classes all worked together to present a Christmas program on Dec. 15 th . The elementary classes recited the poem, "Twas the Night Before Christmas." All three classes performed the play, "Bob, the Goofy Reindeer." The play was followed by Mrs. Dalberg and Mrs. Ward reading the students' letters to Santa. After the performance, everyone enjoyed snacks from trays provided by the Perryville Village Council and desserts provided by volunteers in the community. Two 8 th graders and three freshmen represented Perryville in the 3-man basketball jamboree held at Chignik Bay. Their coach was Eugene Kalmakoff.	
Personnel	
Ashley Temarantz joined the Perryville faculty as secondary teacher. Ms. Temarantz hails from Pennsylvania. This is her first full-time teaching position. Whitney Hurlburt has also joined Perryville's staff as tutor. Bridget Maddeford is working with us as a student teacher. Ms. Maddeford is a student at UAA.	
Student Attendance	
Perryville is currently 4 th in the district attendance challenge.	

Having just completed their play, Perryville elementary students prepare to have their letters read to Santa.

Perryville families enjoy snacks and desserts after the Christmas program. We estimate that there were about 55 people attending.

While nearly every eligible student had a part in our robotics program, Analise Kosbruk and Ty Kosbruk were the ones who stuck with it to the end. Here they are with their coaches and the medals they earned in the competition. Mrs. Dalberg served as coach for the entire season while Mr. Ward helped when he was in the village.

Here are Ty and Analise with the robot. The playing field and the posters for the presentation are behind them. The presentation focused on using nanofilters to filter contaminated water in order to make it usable for people.
