

## **BUILDINGS/GROUNDS & TRANSPORTATION REPORT**

**Date:** May 18, 2020  
**To:** Board of Education  
**From:** Jeff Stauder

### **BUILDINGS/GROUNDS**

#### **Facilities Committee**

Did not meet

#### **Fire Panel**

The High School is needing to replace the fire panel. It came out in 1992 and it is becoming very hard to find parts to repair it. I would like to use Life Safety funds to pay for this. The cost is \$16,388. The Board will need to approve a motion to have BLDD make an amendment to the current 10 year life safety plan. Once this is done it will go to the state to be approved which will take approximately 2 weeks.

#### **High School Chiller**

The chiller work has finally started and it should be up and running by the 20<sup>th</sup> of May. The small unit is still not working. I was informed by Xcell Mechanical this week that they think the unit has been struck by lightning. They are going to submit all the documentation I will need to possibly turn this in to our insurance company. We can function without this unit, as it is mainly a backup unit or if there is a high demand for air.

I don't have much to report this month. I just want to let everyone know that we are doing everything we can at this time to be stocked up with as much cleaning supplies, sanitizers and any other PPE that we may need to open in August.
