Re: Stevenson Traffic Flow and Parking Lot Update

I would like to update the Board about the planned changes to the Stevenson High School parking lot this summer. The work, scheduled to begin soon, has been a team effort between Central Office administration, Stevenson administration, Plante Moran CRESA, and Stantec Architectural/Engineering. We believe we have a plan that will improve the traffic flow during peak periods as compared to the current configuration. At this time, I am requesting this topic to be added to the agenda for the upcoming Committee of the Whole meeting on Monday, June 19, 2017. Thank you.
