

### **Infinite Campus**

Beginning of the school year syncing issues. Working with Rebecca Rappold and all online curricula vendors to iron out. Data being provided from Infinite Campus after their update to the current version, to online vendors via data syncs, is causing those vendors some hiccups, but we will get them all sorted out soon.

### **Switches at stadium**

Two switches were installed and configured a few weeks ago. Cabling for stadium and sound system in the booth have been completed and internet/WiFi are available. There is internet connections in the scoreboard building as well but I was unable to test due to access to other areas of the building

### **NFHS/HUDL Cameras**

Last report from Maintenance/Athletics both cameras were installed or in the process. There will be an additional HUDL camera added in BHS gym as well and last reported it was in the works.

### **Renovated Offices at BES**

The Parent Community Outreach Program will be making their move to this area soon. Printer/WiFi/telephone wire runs should be ready by the middle of the week of September 26th

### **iPads/Macbooks/iPad cases**

At this time all requests for new iPads have been met (Everett ordered 300 iPads some time back) with more on hand as backups. Have asked BMS and BHS staff to take newer cases with keyboards attached and hand off those they're replacing to Napi and other buildings that need them. Have begun phasing out all 4th, 5th and 6th generation iPads. Want to keep our "fleet of iPads" at the forefront and able to operate without issue as newer apps and operating systems evolve. Gathering all older silver macbooks still in service and replacing them with newer ones. All older technology devices will either be recycled or traded for newer devices if possible (most likely recycled)

### **Transition Period**

Still ongoing but see light at end of tunnel.... Still merging myself into being Technology Director and Ben into me.
