

**Department of Technology  
Improvement Plan  
2012-2013**

**District Key Result:** Increase student learning and expand instructional strategies by implementing technology.

**Department Goal:** Increase student use of technology for learning that is reflective of ethical and transformative use of digital tools and environments to create, communicate effectively, collaborate, and think critically while meeting designed learning objectives.

**Supporting Data** (evidence of need): District Technology Integration Goals adopted by the school board contained data showing the need to improve awareness and provide training in the specific area of Student Engagement. This has led to a strong focus on the quality of technology use to support learning. This goal aligns the department work with the District goals.

<b>Measures:</b>	<b>Targets:</b>
1. Annual student focus groups that collect qualitative data to understand use of technology for learning.	1. Gain an understanding and see an increase of reported quality technology use by students for learning and improving 21st Century Skills identified in the goals by 5% each school year.
2. Instructional rounds sample data from classroom observations.	2. Create baseline data about the quality use of instructional technology.
