

NOVA CLASSICAL ACADEMY
MANUAL OF POLICIES APPROVED BY THE BOARD OF DIRECTORS

POLICY 516:

STUDENT MEDICATION - Mandatory

*[Note: The necessary provisions for complying with **Minn. Stat. §§ Minnesota Statutes, sections 121A.22, Administration of Drugs and Medicine, 121A.221, Possession and Use of Asthma Inhalers by Asthmatic Students, and 121A.222, Possession and Use of Nonprescription Pain Relievers by Secondary Students** are included in this policy. The statutes do not regulate administration of drugs and medicine for students age 18 and over or other nonprescription medications. Please note that **§ section 121A.22** does not require school districts to apply the administration of medication rule to drugs or medicine used off school grounds, drugs or medicines used in connection with athletics or extra-curricular activities, and drugs and medicines that are used in connection with activities that occur before or after the regular school day.]*

I. PURPOSE

The purpose of this policy is to set forth the provisions that must be followed when administering nonemergency prescription medication to students at school.

II. GENERAL STATEMENT OF POLICY

The school district Nova Classical acknowledges that some students may require prescribed drugs or medication or telehealth during the school day. The school district's Nova Classical licensed school nurse, Health Office manager, trained health clerk, principal, or teacher will administer prescribed medications, except any form of medical cannabis, in accordance with law and school district procedures.

III. DRUG AND MEDICATION REQUIREMENTS

A. Administration of Drugs and Medicine

1. The administration of prescription medication or drugs at school requires a completed signed request from the student's parent. An oral request must be reduced to writing within two school days, provided that the school district Nova Classical may rely on an oral request until a written request is received.
2. Drugs and medicine subject to Minnesota Statutes, 121A.22 must be administered, to the extent possible, according to school board procedures that must be developed in consultation with:
 - a. a licensed nurse, in a district that employs a licensed nurse under Minnesota Statutes, section 148.171;

- b. a licensed school nurse, in a district that employs a licensed school nurse licensed under Minnesota Rules, part 8710.6100;
- c. a public or private health-related organization, in a district that contracts with a public or private health or health-related organization, according to Minnesota Statutes, 121A.21; or
- d. the appropriate party, in a district that has an arrangement approved by the Commissioner of the Minnesota Department of Education, according to Minnesota Statutes, 121A.21.

3. Exclusions

[Note: The provisions of III.A.3 are optional. The Board may choose to include or exclude any of the provisions specified.]

The provisions on administration of drugs and medicine above do not apply to drugs or medicine that are:

- a. purchased without a prescription;
- b. used by a pupil who is 18 years or older;
- c. used in connection with services for which a minor may give effective consent;
- d. used in situations in which, in the judgement of Nova Classical personnel, including a licensed nurse, who are present or available, the risk to the pupil's life or health is of such a nature that drugs or medicine should be given without delay;
- e. used off school grounds;
- f. used in connection with athletics or extracurricular activities;
- g. used in connection with activities that occur before or after the regular school day;
- h. provided or administered by a public health agency to prevent or control an illness or disease outbreak as provided under Minnesota law;
- i. prescription asthma or reactive airway disease medications can be self-administered by a student with an asthma inhaler if:
 - i. Nova Classical has received a written authorization each school year from the pupil's parent permitting the student to self-administer the medication;

- ii. the inhaler is properly labeled for that student; and
- iii. the parent has not requested Nova Classical personnel to administer the medication to the student.

In a school that does not have a school nurse or school nursing services, the student's parent or guardian must submit written verification from the prescribing professional which documents that an assessment of the student's knowledge and skills to safely possess and use an asthma inhaler in a school setting has been completed.

If Nova Classical employs a school nurse or provides school nursing services under another arrangement, the school nurse or appropriate party must assess the student's knowledge and skills to safely possess and use an asthma inhaler in a school setting and enter into the student's school health record a plan to implement safe possession and use of asthma inhalers.

- j. Epinephrine auto-injectors, consistent with Minnesota Statutes, section 121A.2205, if the parent and prescribing medical professional annually inform Nova Classical in writing that
 - i. the pupil may possess the epinephrine or
 - ii. the pupil is unable to possess the epinephrine and requires immediate access to epinephrine auto-injectors that the parent provides properly labeled to Nova Classical for the pupil as needed.
- k. For the purposes of Minnesota Statutes, 121A.22, special health treatments and health functions, such as catheterization, tracheostomy suctioning, and gastrostomy feedings, do not constitute administration of drugs or medicine.
- l. Emergency health procedures, including emergency administration of drugs and medicine are not subject to this policy.

B. Prescription Medication

1. An "Administering Prescription Medications" form must be completed annually (once per school year) and/or when a change in the prescription or requirements for administration occurs. Prescription medication as used in this policy does not include any form of medical cannabis as defined in Minn. Stat. § Minnesota Statutes, section 152.22, Subd. 6.
2. Prescription medication must come to school in the original container labeled for the student by a pharmacist in accordance with law, and must be administered in a manner consistent with the instructions on the label.

3. The school nurse or other designated person may request to receive further information about the prescription, if needed, prior to administration of the substance.
4. Prescription medications are not to be carried by the student, but will be left with the appropriate school district personnel. Exceptions to this requirement are: prescription asthma medications self-administered with an inhaler (See Part J.5. below Paragraph III.A.3(j) above), and medications administered as noted in a written agreement between the school district and the parent or as specified in an IEP (individualized education program), Section 504 plan, or IHP (individual health plan).
5. The school Nova Classical must be notified immediately by the parent or student 18 years old or older in writing of any change in the student's prescription medication administration. A new medical authorization or container label with new pharmacy instructions shall be required immediately as well.
6. For drugs or medicine used by children with a disability, administration may be as provided in the IEP, Section 504 plan or IHP.
7. The school nurse, or other designated person, shall be responsible for the filing of the Administering Prescription Medications form in the health records section of the student file. The school nurse, or other designated person, shall be responsible for providing a copy of such form to the principal and to other personnel designated to administer the medication.
- ~~8. Procedures for administration of drugs and medicine at school and school activities shall be developed in consultation with a school nurse, a licensed school nurse, or a public or private health organization or other appropriate party (if appropriately contracted by the school district under Minn. Stat. § 121A.21). The school district administration shall submit these procedures and any additional guidelines and procedures necessary to implement this policy to the school board for approval. Upon approval by the school board, such guidelines and procedures shall be an addendum to this policy.~~
9. If the administration of a drug or medication described in this section requires Nova Classical to store the drug or medication, the parent or legal guardian must inform the school if the drug or medication is a controlled substance. For a drug or medication that is not a controlled substance, the request must include a provision designating Nova Classical as an authorized entity to transport the drug or medication for the purpose of destruction if any unused drug or medication remains in the possession of school personnel. For a drug or medication that is a controlled substance, the request must specify that the parent or legal guardian is required to retrieve the drug or controlled substance when requested by the school.

10. Specific Exceptions:

1. Special health treatments and health functions such as catheterization, tracheostomy suctioning, and gastrostomy feedings do not constitute administration of drugs and medicine;
2. Emergency health procedures, including emergency administration of drugs and medicine are not subject to this policy;
3. Drugs or medicine provided or administered by a public health agency to prevent or control an illness or a disease outbreak are not governed by this policy;
4. Drugs or medicines used at school in connection with services for which a minor may give effective consent are not governed by this policy;
5. Drugs or medicines that are prescription asthma or reactive airway disease medications can be self-administered by a student with an asthma inhaler if:
 - a. the school district has received a written authorization from the pupil's parent permitting the student to self-administer the medication;
 - b. the inhaler is properly labeled for that student; and
 - c. the parent has not requested school personnel to administer the medication to the student.

The parent must submit written authorization for the student to self-administer the medication each school year. In a school that does not have a school nurse or school nursing services, the student's parent or guardian must submit written verification from the prescribing professional which documents that an assessment of the student's knowledge and skills to safely possess and use an asthma inhaler in a school setting has been completed.

If the school district employs a school nurse or provides school nursing services under another arrangement, the school nurse or other appropriate party must assess the student's knowledge and skills to safely possess and use an asthma inhaler in a school setting and enter into the student's school health record a plan to implement safe possession and use of asthma inhalers;

6. Medications:
 - a. that are used off school grounds;
 - b. that are used in connection with athletics or extracurricular activities; or

e. —that are used in connection with activities that occur before or after the regular school day are not governed by this policy.

C. Nonprescription Medication.

A secondary student may possess and use nonprescription pain relief in a manner consistent with the labeling, if the school district Nova Classical has received written authorization from the student's parent or guardian permitting the student to self-administer the medication. The parent or guardian must submit written authorization for the student to self-administer the medication each school year. The school district may revoke a student's privilege to possess and use nonprescription pain relievers if the school district Nova Classical determines that the student is abusing the privilege. This provision does not apply to the possession or use of any drug or product containing ephedrine or pseudoephedrine as its sole active ingredient or as one of its active ingredients. Except as stated in this paragraph, only prescription medications are governed by this policy.

[Note: School districts should consult with licensed medical and nursing personnel to address whether nonprescription medications will be allowed at elementary schools and whether and under what conditions school personnel will participate in storing or administering nonprescription medications.]

D. Possession and Use of Epinephrine Auto-Injectors

At the start of each school year or at the time a student enrolls in school, whichever is first, a student's parent, school staff, including those responsible for student health care, and the prescribing medical professional must develop and implement an individualized written health plan for a student who is prescribed epinephrine auto-injectors that enables the student to:

1. possess epinephrine auto-injectors; or
2. if the parent and prescribing medical professional determine the student is unable to possess the epinephrine, have immediate access to epinephrine auto-injectors in close proximity to the student at all times during the instructional day.

For the purposes of this policy, **instructional day** is defined as eight hours for each student contact day.

The plan must designate the school staff responsible for implementing the student's health plan, including recognizing anaphylaxis and administering non-syringe injectors of epinephrine when required, consistent with state law. This health plan may be included in a student's § Section 504 plan.

Nova Classical may obtain and possess epinephrine auto-injectors to be maintained and administered by school personnel, including a licensed nurse, to a student or other individual if, in good faith, it is determined that person is experiencing anaphylaxis regardless of whether the student or individual has a prescription for an epinephrine auto-injector. The administration of an epinephrine auto-injector in accordance with Minnesota Statutes, section 121A.2207 is not the practice of medicine.

Effective July 1, 2024, registered nurses may administer epinephrine auto-injectors in a school setting according to condition-specific protocol as authorized under Minnesota Statutes, section 148.235, subdivision 8. Notwithstanding any limitation in Minnesota Statutes, sections 148.171 to 148.285, licensed practical nurses may administer epinephrine auto-injectors in a school setting according to a condition-specific protocol that does not reference a specific patient and that specifies the circumstances under which the epinephrine auto-injector is to be administered, when caring for a patient whose condition falls within the protocol.

Nova Classical may enter into arrangement with manufacturers of epinephrine auto-injectors to obtain epinephrine auto-injectors at fair-market, free, or reduced prices. A third party, other than a manufacturer or supplier, may pay for a school's supply of epinephrine auto-injectors.

E. Sunscreen

A student may possess and apply a topical sunscreen product during the school day while on school property or at a school-sponsored event without a prescription, physician's note, or other documentation from a licensed health care professional. School personnel are not required to provide sunscreen or assist students in applying sunscreen.

~~11. "Parent" for students 18 years old or older is the student.~~

~~12. Districts or schools Nova Classical may obtain and possess epinephrine auto-injectors to be maintained and administered by school personnel to a student or other individual if, in good faith, it is determined that person is experiencing anaphylaxis regardless of whether the student or other individual has a prescription for an epinephrine auto-injector. The administration of an epinephrine auto-injector in accordance with this section is not the practice of medicine.~~

~~A district or school Nova Classical may enter into arrangements with manufacturers of epinephrine auto-injectors to obtain epinephrine auto-injectors at fair-market, free, or reduced prices. A third party, other than a manufacturer or supplier, may pay for a school's Nova Classical's supply of epinephrine auto-injectors.~~

F. Procedure regarding unclaimed drugs or medications

1. Nova Classical has adopted the following procedure for the collection and transport of any unclaimed or abandoned prescription drugs or medications remaining in the possession of school personnel in accordance with this policy. Before the transportation of any prescription drug or medication under this policy, Nova Classical shall make a reasonable attempt to return the unused prescription drug or medication to the student's parent or legal guardian. Transportation of unclaimed or unused prescription drugs or medications will occur at least annually, but may occur more frequently at the discretion of Nova Classical.
2. If the unclaimed or abandoned prescription drug is not a controlled substance as defined under Minnesota Statutes, section 152.01, subdivision 4, or is an over-the-counter medication, Nova Classical will either designate an individual who shall be responsible for transporting the drug or medication to a designated drop-off box or collection site or request that a law enforcement agency transport the drug or medication to a drop-off box or collection site on behalf of Nova Classical.
3. If the unclaimed or abandoned prescription drug is a controlled substance as defined in Minnesota Statutes, section 152.01, subdivision 4, Nova Classical or school personnel is prohibited from transporting the prescription drug to a drop-off box or collection site for prescription drugs identified under this paragraph. Nova Classical must request that a law enforcement agency transport the prescription drug or medication to a collection bin that complies with Drug Enforcement Agency regulations, or if a site is not available, under the agency's procedure for transporting drugs.
