ITEM

SUBJECT: Results Driven Accountability (RDA) Report

RATIONALE:

The Results Driven Accountability system was formerly known as the Performance-Based Monitoring Analysis System (PBMAS).

The Results Driven Accountability (RDA) is an automated data system that reports annually on the performance of local education agencies (LEAs) in selected program areas (bilingual education/English as a second language, career and technical education, certain federal Title programs, and special education).

RDA is a second layer of accountability and data reporting, focused on students served in federally funded programs. This data compares district performance of students in these programs to pre-established cut points.
