School Psychologist/Intervention Specialist
NSSED
Highland Park, IL

REMARKS:

Rosanne Wozney joins District 28 after more than a decade working at the Northern Suburban Special Education District. A Wisconsin native, Rosanne received her undergraduate and graduate degrees at the University of Wisconsin, LaCrosse, and then moved to Illinois to begin her work as a School Psychologist. Rosanne has extensive experience in several local districts serving students with complex learning needs. She has worked directly with students to develop more effective coping and social skills, and she has also worked in a coaching role with district social workers, psychologists, and general education teachers to more effectively support a wide range of learners across classroom environments. Rosanne brings a wealth of knowledge about learners who are most impacted by their disabilities, and her focus on developing skills that will lead to greater student independence long after graduation will serve the students of District 28 well.
