Training thoughts and questions

Do you feel like it was valuable?

What more support do we need in order to implement this?

Seek teacher challenge during Earth Week in order to get comfortable using it.

Where do we need more training?

It was helpful information for staff, not sure how to implement it for students.

Is it accessible for all students as they would have to have a phone?

Should it be just one of many options for engaging students in EE?

How does it fit in all subject areas?

It could be a way to get students who prefer to use technology outside in nature.

We discussed using it as a teacher challenge for gathering information on how best to use it with students.

February Teacher Survey

What pieces of our ELP are in your classes?

What areas do you want to see more training?

How confident are you in teaching EE?

Areas of training need - developing online ee resources and understanding the tools that students are using.

Check out the U of M training resources/opportunities.

Next meeting: Look at what we have in place in each grade band that meets the needs of our ELP.

In our next meeting we will look at what area of the ELP are represented in each grade level in order to gauge the need for more focus in specific areas.
