Investment Strategy	<p>The College District maintains portfolios that use four specific investment strategy considerations designed to address the unique characteristics of the fund groups represented in the portfolio(s). The weighted average maturity of the overall portfolio will not exceed one year.</p> <p>Strategies for the investment of College District funds will address:</p>

APPROPRIATIONS AND REVENUE SOURCES
INVESTMENTS

CAK
(LOCAL)

1. Investment suitability as it relates to the financial requirements and credit concerns of the College District;
2. Preservation and safety of principal to ensure that capital losses are avoided whether they be from defaults or erosion of market value;
3. Liquidity to the extent needed to pay the College District's obligations as they become due;
4. Investment marketability provided the need arises for the College District to liquidate the investment prior to its maturity date, although securities of all types are purchased with the intention of holding until maturity;
5. Investment diversification by maturity and market sector; and
6. Yield to attain the best yield on investments, while considering risk constraints and cash flow needs; the basis or benchmark used to determine whether market yields are being achieved will be the one-year Treasury Bill chosen for its comparability to the portfolio's maximum weighted average maturity.

Operating Fund	The primary objective of the investment strategy for the operating fund will be to ensure that anticipated cash flows are matched with adequate investment liquidity. Maturities will be staggered to meet operating expenditures, based on known and projected cash flows and market conditions. Thirty-six months is the maximum maturity for the majority of securities in the portfolio.
Building Fund	The primary objective of the investment strategy for the building fund will be to ensure that maturities are matched with anticipated cash flows. Maturities will be staggered so that they coincide with estimated draw down dates based on construction schedules and estimated project completion dates.
Debt Service Fund	The primary objective of the investment strategy for the debt service fund will be to ensure that investment liquidity is adequate to cover each succeeding debt service obligation on the required payment date. No investments may be made that exceed the next unfunded debt service payment date.
Debt Service Reserve Funds	Debt service reserves have no anticipated expenditures. The funds are deposited to provide annual debt service payment protection to bond holders. Market conditions and arbitrage regulation compliance determine the advantage of security diversification and liquidity. Generally, if investment rates exceed the applicable arbitrage yield for a specific bond issue, the College District is best served by locking in investment maturities and reducing liquidity. If the arbitrage yield cannot be exceeded, the concurrent market conditions

will determine the attractiveness of locking in maturities or investing shorter and anticipating future increased yields. Managing the portfolios maturities to not exceed the call provisions of the bond issue will reduce the investment's market risk if the College District's bonds are called and the reserve fund liquidated. No investment maturity will exceed three years. All portfolio investments will be in compliance with bond covenants and insurance requirements of all bond issues.
