

Beeville ISD School Wellness Policies on Physical Activity and Nutrition

Background

In the Child Nutrition and WIC Reauthorization Act of 2004, the U.S. Congress established a new requirement that all school districts with a federally-funded school meals program develop and implement wellness policies that address nutrition and physical activity by the start of the 2006-2007 school year.

With the concerted efforts of the 2005-2006 Beeville ISD School Health Advisory Committee, Beeville ISD School Health Services personnel, and the Beeville ISD Director of Food Services, the Beeville ISD School Health Wellness Plan was developed to assist in good health and well-being for all Beeville ISD students.

The nutrition and physical activity policies below meet the new federal requirement. This comprehensive set of nutrition and physical activity policies¹ is based on nutrition science, public health research, and existing practices from exemplary states and local school districts around the country. The NANA work group's first priority was to promote children's health and well-being

The Appendix contains a list of selected resources to assist with the development, implementation, and monitoring/review of local wellness policies. In addition, many of the members of the National Alliance for Nutrition and Activity listed below are available to provide advice and assistance as school districts undertake this important task.

¹ Some aspects of a broader conception of "wellness" are not addressed in the model policies that follow. NANA encourages school districts to establish and maintain a coordinated school health program that addresses all components of school health, including mental health services and school health services, which are not addressed in these model policies. These model policies also do not address certain important related areas, such as counseling services for those with eating disorders; food safety policies; and policies to reduce weight-related bullying.

Beeville School District's Wellness Policies on Physical Activity and Nutrition

Preamble

Whereas, children need access to healthful foods and opportunities to be physically active in order to grow, learn, and thrive;

Whereas, good health fosters student attendance and education;

Whereas, obesity rates have doubled in children and tripled in adolescents over the last two decades, and physical inactivity and excessive calorie intake are the predominant causes of obesity;

Whereas, heart disease, cancer, stroke, and diabetes are responsible for two-thirds of deaths in the United States, and major risk factors for those diseases, including unhealthy eating habits, physical inactivity, and obesity, often are established in childhood;

Whereas, 33% of high school students do not participate in sufficient vigorous physical activity and 72% of high school students do not attend daily physical education classes;

Whereas, only 2% of children (2 to 19 years) eat a healthy diet consistent with the five main recommendations from the Food Guide Pyramid;

Whereas, school districts around the country are facing significant fiscal and scheduling constraints; and

Whereas, community participation is essential to the development and implementation of successful school wellness policies;

Thus, the Beeville School District is committed to providing school environments that promote and protect children's health, well-being, and ability to learn by supporting healthy eating and physical activity. Therefore, it is the policy of the Beeville School District that:

- The school district will engage students, parents, teachers, food service professionals, health professionals, and other interested community members in developing, implementing, monitoring, and reviewing district-wide nutrition and physical activity policies.
- All students in grades K-12 will have opportunities, support, and encouragement to be physically active on a regular basis.
- Foods and beverages sold or served at school will meet the nutrition recommendations of the *U.S. Dietary Guidelines for Americans*.

- Qualified child nutrition professionals will provide students with access to a variety of affordable, nutritious, and appealing foods that meet the health and nutrition needs of students.
- To the maximum extent practicable, all schools in our district will participate in available federal school meal programs (including the School Breakfast Program, National School Lunch Program, and Summer Food Service Program).
- Schools will provide nutrition education and physical education to foster lifelong habits of healthy eating and physical activity, and will establish linkages between health education and school meal programs, and with related community services.

TO ACHIEVE THESE POLICY GOALS:

I. School Health Councils

The school district and/or individual schools within the district will create, strengthen, or work within existing school health councils to develop, implement, monitor, review, and, as necessary, revise school nutrition and physical activity policies. The councils also will serve as resources to school sites for implementing those policies. (A school health council consists of a group of individuals representing the school and community, and should include parents, students, representatives of the school food authority, members of the school board, school administrators, teachers, health professionals, and members of the public.)

II. Nutritional Quality of Foods and Beverages Sold and Served on Campus

School Meals

Meals served through the National School Lunch and Breakfast Programs will:

- be appealing and attractive to children;
- be served in clean and pleasant settings;
- meet, at a minimum, nutrition requirements established by local, state, and federal statutes and regulations;
- offer a variety of fruits and vegetables;
- offer a variety of milks: low-fat (1%) fat-free milk² and nutritionally-equivalent non-dairy alternatives (to be defined by USDA); and

² As recommended by the *Dietary Guidelines for Americans 2005*.

- offer a variety of whole grain products.³

Breakfast. To ensure that all children have breakfast, either at home or at school, in order to meet their nutritional needs and enhance their ability to learn:

- Schools will, to the extent possible, operate the School Breakfast Program.
- Schools will, to the extent possible, arrange bus schedules and utilize methods to serve school breakfasts that encourage participation, including serving breakfast in the classroom.
- Schools that serve breakfast to students will notify parents and students of the availability of the School Breakfast Program.
- Schools will encourage parents to provide a healthy breakfast for their children through newsletter articles, take-home materials, or other means.

Free and Reduced-priced Meals. Schools will make every effort to eliminate any social stigma attached to, and prevent the overt identification of, students who are eligible for free and reduced-price school meals³. Toward this end, schools may utilize electronic identification and payment systems; promote the availability of school meals to all students; and/or use nontraditional methods for serving school meals, such as classroom breakfast.

Summer Food Service Program. Schools in which more than 50% of students are eligible for free or reduced-price school meals will sponsor the Summer Food Service Program for the contractual number of days of summer school.

Meal Times and Scheduling. Schools:

- will provide students with at least 10 minutes to eat after sitting down for breakfast and 20 minutes after sitting down for lunch;
- should schedule meal periods at appropriate times, *e.g.*, lunch should be scheduled between 11 a.m. and 1 p.m. or as the campus schedule allows;
- should not schedule tutoring, club, or organizational meetings or activities during mealtimes, unless students may eat during such activities;
- will provide students access to hand washing or hand sanitizing before they eat meals or snacks.

Qualifications of School Food Service Staff. Qualified nutrition professionals will administer the school meal programs. As part of the school district's responsibility to operate a food service program, we will provide continuing professional development for all nutrition professionals in schools. Staff development programs should include

³ It is against the law to make others in the cafeteria aware of the eligibility status of children for free, reduced-price, or "paid" meals.

appropriate certification and/or training programs for child nutrition directors, school nutrition managers, and cafeteria workers, according to their levels of responsibility.⁴

Sharing of Foods and Beverages. Schools should discourage students from sharing their foods or beverages with one another during meal or snack times, given concerns about allergies and other restrictions on some children's diets.

Foods and Beverages Sold Individually (*i.e.*, foods sold outside of reimbursable school meals, such as through vending machines, cafeteria a la carte [snack] lines, fundraisers, school stores, etc.)

Elementary Schools. Given young children's limited nutrition skills, food in elementary schools should be sold as balanced meals. Schools shall not provide foods of minimal nutritional value to students at anytime during the school day. If available, foods and beverages sold individually should be limited to low-fat and non-fat milk, fruits, and non-fried vegetables.

Middle/Junior High and High Schools. In middle/junior high and high schools, all foods and beverages sold individually outside the reimbursable school meal programs (including those sold through a la carte [snack] lines, vending machines, student stores, or fundraising activities) during the school day, will meet nutrition and portion size standards as per the *Texas Public School Nutrition Policy at a Glance*. (See attachment)

Fundraising Activities. To support children's health and school nutrition-education efforts, school fundraising activities will meet child nutrition guidelines as age appropriate.

Snacks. Snacks served during the school day will make a positive contribution to children's diets and health, with an emphasis on serving fruits and vegetables as the primary snacks and water as the primary beverage. Schools will assess if and when to offer snacks based on timing of school meals, children's nutritional needs, children's ages, and other considerations.

Rewards. Schools will encourage non food rewards. Examples of non food rewards include but are not limited to: treasure box items, coupons, extra "free" time, listen with a headset to a book or audiotape, "free choice" time at end of day, play a computer game, etc. (See attachment)

Celebrations. Schools should limit celebrations that involve food during the school day to the three approved events as designated by the school calendar. The district shall encourage events to occur after the scheduled school lunch period.

III. Nutrition and Physical Activity Promotion and Food Marketing

⁴ School nutrition staff development programs are available through the USDA, School Nutrition Association, and National Food Service Management Institute.

Nutrition Education and Promotion. Beeville School District aims to teach, encourage, and support healthy eating by students. Schools should provide nutrition education and engage in nutrition promotion.

Integrating Physical Activity into the Classroom Setting. Beeville School District will encourage students to receive the nationally-recommended amount of daily physical activity and for students to fully embrace regular physical activity as a personal behavior, they need opportunities for physical activity beyond physical education class. Toward that end:

- classroom health education will complement physical education by reinforcing the knowledge and self-management skills needed to maintain a physically-active lifestyle and to reduce time spent on sedentary activities, such as watching television;
- opportunities for physical activity will be incorporated into other subject lessons; and
- classroom teachers are encouraged to provide short physical activity breaks between lessons or classes, as appropriate.

Staff Wellness. Beeville School District highly values the health and well-being of every staff member and will encourage activities that support personal efforts by staff to maintain a healthy lifestyle.

IV. Physical Activity Opportunities and Physical Education

Physical Education (P.E.) K-12. All students in grades K-12, including students with disabilities and special health-care needs will receive physical education as required by Texas Education Agency for the entire school year.

Recess. All elementary school students will have daily supervised recess, preferably outdoors, during which schools should encourage moderate to vigorous physical activity.

Schools should discourage extended periods (*i.e.*, periods of two or more hours) of inactivity. When activities, such as mandatory school-wide testing, make it necessary for students to remain indoors for long periods of time, schools should give students periodic breaks during which they are encouraged to stand and be moderately active.

Use of School Facilities Outside of School Hours. School spaces and facilities should be available to students, staff, and community as per the Beeville ISD school board policy. (GKD [Legal], GKD [Local])

V. Monitoring and Policy Review

Monitoring. The superintendent or designee will ensure compliance with established district-wide nutrition and physical activity wellness policies. In each school, the principal or designee will ensure compliance with those policies in his/her school.

School food service staff, at the school or district level, will ensure compliance with nutrition policies within school food service areas and will report on this matter to the deputy superintendent. In addition, the school district will report on the most recent USDA School Meals Initiative (SMI) review findings and any resulting changes.

Policy Review.

Policy revision will be made upon Child Nutrition and U.S. Congress requirement changes. The district will, as necessary, revise the wellness policies and develop plans to facilitate their implementation.
