Re: Interactive Monitors Purchase

Description of Need/Background

On December 13, 2021 the Board approved a purchase of interactive monitors in an amount not to exceed \$1,280,000. Since that time the district has added new positions to the district such as elementary and middle school counselors, student support advisors, special education staffing, etc. We did not have excess inventory to outfit new offices and or classrooms for interactive monitors. After working with building administration we have determined a need for eleven additional interactive monitors.

Purchase Information

Cost:	\$61,143.53
Vendor:	Bluum of Minnesota, LLC
Source of Funds:	2019 Bond

Recommendation

I am recommending to the Board for consideration the purchase of \$61,143.53 for interactive monitors to accommodate additional needs as discussed with building administration. We were able secure this pricing utilizing already bid and negotiation contracts.
