ACT

ISBE announced the switch from SAT to ACT starting next year. With this some changes will be happening.

1. There will be enough Science on the ACT that 11th graders won't have to take the separate Science test.
2. ISBE finally realized that the cut scores for SAT were too difficult. SAT had their cut scores, and Illinois had their own. The Illinois Cut Scores were some of the highest in the nation. They plan on having more realist cut scores for the ACT.

Consolidated Plan

The Consolidated Plan replaced the Title Plan about 4 years ago. In addition to the Title Grants it covers all grants. It also covers things like Homeless, Youth In Care, and ELL learners. We didn't make any changes to the plan. I am still waiting on Faith Bible to get me their numbers, so their portion of the Title Grants can be calculated. It is in 2 parts because it wouldn't scan as 1, it said not enough memory error.
