Re: Aramark References and Green Products

Board members,

Below is a list of "green" products that Aramark uses – there is a disinfectant used, by Diversey called Virex 256 that is used and is not green seal certified. The below items are what has been a movement for the last few years in moving forward with green products where it makes sense in our cleaning for health program. I have attached a summary of references that I have personally communicated with regarding Aramark's contract terms. Had I attached copies of the contracts submitted, your board packet would have been several hundred pages larger than it already is. You are welcome to review those contracts in my office if you would like. In reviewing the terms of contracts, I did not notice anything out of the ordinary or that was drastically different than our agreement.

Equipment-Tennant

Orbio- Water electrolysis process converts water, electricity and a small amount of salt into effective cleaning and antimicrobial solutions. Improves health and safety by reducing exposure to highly concentrated conventional chemicals, decreases unwanted odors, elevates indoor air quality. Dramatically reduces environmental impact, minimizes disposal requirements, reducing carbon footprint. Lowers cost due to less purchasing of conventional packaged chemicals, reduces costs for training, ordering, stocking and inventorying.

T-3 eCH₂O Walk Behind Scrubber- Small scrubber: electrically converts water into an innovative cleaning solution that cleans effectively, saves money, and reduces environmental impact compared to daily floor cleaning chemicals. This converted water is created by an on-board e-cell that generates millions of very tiny microscopic bubbles known as Nano bubbles that promote the cleaning efficacy of the solution.

T-5 eCH₂O Walk Behind Scrubber -Midsized floor scrubber electrically converts water into an innovative cleaning solution that cleans effectively, saves money, reduces environmental impact compared to daily floor cleaning chemicals. This converted water is created by an on-board e-cell that generates millions of very tiny microscopic bubbles known as Nano bubbles that promote the cleaning efficacy of the solution

Chemicals-Diversey products

All chemicals are mixed using wall mounted RTU system. System uses premixed bottles and water to auto fill chemicals for staff ensuring the correct ratio every time.

Stride- Neutral floor cleaner, Green Seal certified

Glance- Window and all-purpose cleaner, Green seal certified

Crew-Bathroom cleaner and scale remover, Green seal certified
