Hi All:

I feel there is a need for the weight room for the students. Upon review of Ordinance 121 it would be allowable, since it allows for recreational activities and being that it is cold, the students need an outlet to stay in shape or get in shape. Exercise and lifting of weights helps the body physically and mentally. As a former coach it allows the students to remain in shape and focus on their one sport or all the sports they are involved in. I believe there was a plan submitted regarding the safety and protocols in regards to COVID.

Also, I was under the understanding that we were to discuss having more spectators after Christmas. The gym is spacious enough to have at least 2 spectators per player.

In regards to having trainers at the games, why are they not present to help the student athletes when they need it. It seems more cost effective to have them there as does each other school in the state.

If those items can be added to the board agenda or if there is a need for a special meeting with these topics.

Thank You

Mistee

I too would like to see these items on the agenda along with opening school under our blended model. Get Outlook for iOS
