

# Memo

**To:** Board of Education  
**From:** Lane Findlay  
**Date:** July 28, 2025  
**Re:** Weber County Pre-Disaster Mitigation Plan

---

Board Members,

Weber County has recently completed the required update to its Pre-Disaster Mitigation (PDM) Plan, in accordance with Federal Emergency Management Agency (FEMA) guidelines. FEMA requires counties to review and update their hazard mitigation plans every five years to remain eligible for federal mitigation funding.

To assist with this process, the Weber County Emergency Services Division contracted with an external consultant to manage the application and update process. As a stakeholder within the county, Weber School District is required to participate in the multi-jurisdictional plan to maintain eligibility for pre-disaster mitigation grant funding.

As part of this requirement, the Board of Education must pass a formal resolution of support. The attached resolution confirms the district's participation and formally adopts the updated PDM plan.

Please review the attached resolution in preparation for board action.

Sincerely,

Lane Findlay  
Public Information & Safety Officer
