RE: Project VCS 2466a – District-wide data cabling additions

October 7<sup>th</sup>, 2014

VCS Board of Education,

Over 250 contractors and plan houses received the RFP for installation of structured cabling to support voice, data, surveillance cameras, wireless, and other technology devices. The two low bidders were DataCom Group and Amcomm Telecommunications. Secant has reviewed each proposal thoroughly, checked references for each company, and conducted post-bid interviews with the two lowest bidders.

After extensive review, Secant recommends that Vicksburg Community Schools award DataCom Group the complete project in the amount detailed below. This total includes the base bid amount and performance bond cost. Any contingency funds would be in addition to this amount.

DataCom will commence work shortly after confirmation of proposal acceptance and after preliminary paperwork has been completed.

<b>Company Name</b>	<b>Work Section(s)</b>	<b>Award Recommendation</b>
DataCom Group	Structured Cabling	\$ 80,985.00
