Re: Celebrating Success - The Lü Interactive Playground at Half Day School

---

The Half Day Physical Education Staff and fifth-grade representatives will be in attendance to share the student experience with using the Lü Interactive Playground. The Lü transforms the gym into an engaging, technology-driven learning environment where students are motivated to move, learn, and collaborate. By combining physical activity with interactive games and educational content, Lü promotes fitness, coordination, teamwork, and critical thinking. Students stay active while practicing skills in subjects like math, language, and science—all through play. This immersive experience supports social-emotional learning, improves focus, and makes physical education fun and inclusive for all learners. We are excited to share this favored “gamefied” PE experience!
