RE: MAY 2020 TRANSPORTATION REPORT

In the notes for the March Board Report, I had written that it would not be long before we would be taking trips for the end of this school year. That changed quickly and we are ending the year with a new and different set of routines.

Bodine Environmental Services took some soil borings around our fuel pumps this last month to test for contamination. The results should be coming in soon.

Rockford Map Publishers has made new district maps for the Unit Office and the Transportation Department. The maps will be here soon.

The drivers are taking food and homework packets to students. We are delivering and picking up artwork. Sewing projects went to HS students. Some chrome books and plug in cords have been in our deliveries. Contents of some HS lockers went to some HS students.

The busses are all “detailed” and thoroughly cleaned for the start of next year. Brad is doing oil changes and repairs on the larger vehicles. He is doing maintenance oil changes and repairs on the smaller vehicles now. The #20 white transit van was sold. The new vans we are purchasing this year should be here by July.

The offices, garage/shop, Quonset, bathroom and break room have gone through or are in the process of a “spring cleaning”.

Two busses are at the end of their leases and will be going back soon. The International wheelchair bus is going back within the next few weeks. International will replace it with a new wheelchair bus.

The Bluebird bus will be going back after July 1st. Bluebird will replace this bus with a 77-passenger bus.

We always look forward to seeing the new busses come in. And that all the vehicles are ready for a new school year!
