FEATURE	BENEFIT	VDI
16 Lessons for a Comprehensive Curriculum	Virtual Driving Essentials (VDE) is more than a series of "exercises". It is a full curriculum of progressive driving experiences in an extensive virtual world that contains over 50 miles of city, highway, commercial, residential, rural, and off-road environments providing a nearly limitless combination of unique driving scenarios. The curriculum defines the physics of each problem, demonstrates the potential effects of each problem then allows the student to experience the situation and measure their performance accordingly.	✓
"Life Bar" with Real Time Scoring	Educators know the faster you provide feedback on what someone has done wrong—the faster the transfer of learning takes place. Real time infractions are reflected both in words and scoring in the "Life Bar" at the top of the screen to accelerate retention and understanding.	✓
Parental Companion Program	Studies have proven that the more actively involved parents are in coaching and monitoring their new drivers, the less likely teens will engage in risky behaviors that lead to crashes. The Parental Companion is a web-based program provided with VDE that can be accessed by any computer or mobile device to allow parents or guardians to view the same lesson material as the students in class for additional discussion and to reinforce those behaviors outside the classroom.	✓
Pre & Post Assessment Drives	VDI's Pre-Assessment drive provides a baseline against which the Post Assessment drive can be measured. These scores afford the opportunity for students to demonstrate improvement and provide Proof of Learning as well as mastery of topics.	✓
Texting/Distracted Driving/Pedestrian Lessons	Intelligent traffic presents changing and challenging scenarios which allow students to experience the dangers of being distracted firsthand, both as a driver and as a pedestrian.	✓
Vision™ Reporting Program	Virtual Driving Essentials includes the powerful Vision reporting tool that allows teachers to track, measure and numerically score individual student performance. Drill down reports provide unique insights into each student's strengths and weaknesses for additional coaching. Vision allows instructors to export reports in Excel to further customize reporting.	✓
Hydroplaning/Skidding & Overcorrection	Virtual Driving Essentials allows assessment of complex driving behaviors and skills in "real-life' situations that are too dangerous to replicate in real life.	✓
Ghosting/Slow Motion/Multiple Points of View	Virtual Driving Essentials allow teachable moments to be reviewed from different perspectives using special effects like slow motion and ghosting to drive home key safety lessons.	✓
Ongoing Software Updates	Most vendors are selling the same software developed many years ago. Over the last five years, Virtual Driving Essentials has been updated six times and will continue to improve as technology evolves.	✓
Full Warranty & Ongoing Service After the Sale	VDI's in-house team provides a single point of contact for all Customer Service and Warranty issues. Unlike other companies, VDI will never direct you to a third-party vendor. Service contracts are available for as little as $649 per year and provide unlimited phone support, free updates, and discounts on replacement parts.	✓
Made in America	VDI is a wholly U.S. owned, and operated company and our products and services fully comply with the Buy American Act.	✓
