

## Notes on Policy GBEDA Drug and Alcohol Testing

From OSBA

The definition for drugs in this policy comes from federal regulation. Here is the link for that section of the regs that defines drugs:

<https://www.ecfr.gov/current/title-49/subtitle-A/part-40/subpart-A/section-40.3>

### [49 CFR 40.3 -- What do the terms used in this part mean?](#)

The Code of Federal Regulations (CFR) is the official legal print publication containing the codification of the general and permanent rules published in the Federal Register by the departments and agencies of the Federal Government. The Electronic Code of Federal Regulations (eCFR) is a continuously updated online version of the CFR. It is not an official legal edition of the CFR.

[www.ecfr.gov](http://www.ecfr.gov)

Because this is a federal regulation OSBA uses those definitions. I don't have an answer as to why specific hallucinogens are not included other than the ability to test such a wide range of substances might be cost prohibitive.
