Developing Mathematical Thinking (DMT) Observation

Claire Gates from Education Northwest was able to spend the day observing 6-12 math teachers on October 19th. She provided great feedback to our principals and held post observation meetings with our high school teachers using the DMT observation tool. The same teachers will work with me during the professional development day November 13th to discuss further implementation of DMT strategies in the classroom. They will also have the opportunity to conduct peer observations the following week.

Eureka Math Training

A teacher from each grade level 3-8 will be attending Eureka training for implementation and customization. These leaders will be able to train their team to better implement the program when they return.

New Teacher Training

Our second full day of new teacher training with Margo Healy and Debbie Pfeifer will take place this week. We have had excellent feedback from the training that took place in August. Since the initial meeting the new teachers have been working with Debbie on instructional strategies and have had the opportunity to conduct peer observations with her.

Federal Program Review

We continue to gather documentation and prepare for our federal program review that will take place in January.
