

## Curriculum Director Report August 15,2022

### **Math Workshop**

The ROE came in and had a 3 day workshop on Differentiated Instruction for Math. We had a 3 day one for 6-12, and a 3 day one for K-5. The feedback was very positive. In addition to the presentation, the teachers got time to plan activities, collaborate, and discuss issues that we are having in math.

### **Test Scores**

We continue to get more information back on the assessments from last year. I am really pleased with the performance of our students, and look forward to sharing this with you in November.
