

KAUFMAN ISD - MAINTENANCE REPORT JUNE 2026

The Kaufman ISD maintenance team has continued to work on improvement projects around the district. In addition to those projects, there were over 220 campus based work orders that were completed during the month of May.

Here are a few of the projects that the team has been working on this month:

This month, the maintenance team put a fresh coat of paint on the band tower. Here, Steve paints some detail work with a brush while covering the larger surfaces with a spray rig.

There was a lot of plumbing work done around the district in May. Below, Benny suits up and drops into the lift station at Nash to do some major repair work.

In May, the crew started multiple projects around the district. Here the crew begins the demolition of the high school kitchen. The remodeled kitchen will have new floors and serving lines.

Here is more demolition for remodel work. Above, the restrooms in the aux gym are being prepared for a remodel. Below, the Steam Lab at Monday is being prepped for renovation. The crew has to work fast in order to get these projects completed before next school year.

This window was a special project at Monday. The sliding glass was installed so the secretary can communicate with visitors in the foyer.
