

# SCHOOL HEALTH ADVISORY COUNCIL

TEA's iWatch program.

Executive Order GA-07 signed by Governor Abbott requires all schools to have a safety reporting system to allow students, staff, and families to report suspicious activity. After conducting thorough research, I found that TEA's iWatch program not only meets the State mandate but also provides a comprehensive and free solution. The iWatch program, which we are proposing, works seamlessly with the local fusion center and provides a user-friendly suspicious activity reporting tool. This ensures that any concerning behavior is reported, vetted, and addressed with utmost convenience and ease. F.

I downloaded the free AP and thoroughly tested it to ensure Venus ISD was seamlessly integrated into the system. The results were promising, with the program effectively capturing and addressing suspicious activities.
