Background Information

Superintendent Jaszczak will present updated information on Flight Paths 2030.

Key Aspects of the Flight Paths 2030 Program

Red Wing Public Schools launched Flight Path 2030 in fall 2025 thanks to a \$3.2 million pledge from Dwight and Dian Diercks. The five-year plan will see that Winger graduates are digitally fluent, ethically grounded, and future-ready. In today's world, using data and artificial intelligence responsibly is as essential as reading and math, so we're aligning classrooms, counseling, and partnerships accordingly. Flight Path 2030 complements the Winger Flight Paths career-readiness program and after five years will be embedded the curriculum.
