

Current State of the Education Profession in Southeastern Idaho

K-12 Region V Superintendent's and ISU College of Education Professionals have identified several factors affecting the current state of the education profession in Idaho. They are as follows:

- Teacher applicant pool is scarce.
- Teachers are leaving the field of education for a multitude of reasons including retirement.
- Professional wages are low and improvement is uncertain.
- Increased performance demands without adequate support and time to implement the expectations has placed additional stress on teachers.

December, 2014
