Thanks to the committee that worked hard through many challenges to complete the process of adopting a new Mathematics curriculum. During the 2022-2024 school years, Kindergarten-5th grade Mathematics teachers representing our elementary schools reviewed and analyzed several mathematics curriculums to determine the one that would best fit our district and most importantly, student needs. The final decisions on each curriculum was presented to the District Curriculum Advisory Committee on February 6, 2024 for discussion, was made available to the public on February 8, 2024 for discussion, and will be presented this evening for your approval.
