Mike Jones
Superintendent
Chico Independent School District
400 South Hovey Street
Chico, Texas 76431
(940) 644 2228

Dear Mr. Jones,

Thank you so much for the opportunity to bid to continue providing you with propane service for the 2012/2013 school year. Wise Service Company - Fuel will sell you propane for 15 cents a gallon above our purchase price at the time you order; for example; if you were to buy today and my purchase price is \$1.07 cents your cost would be \$1.22. This pricing is all inclusive; I do not have surcharges or additional fees. As I understand your needs, you have a 2000 gallon fill station for your busses and we would supply this station with propane. We would monitor and keep propane in your fill station at our convenience so you would not have to monitor them and call for delivery. Mr. Jones, I look forward to continuing to serve you in the future, saving you money and providing you with reliable service is my goal. If you would like to lock in and guarantee this price through the end of June 2013 please sign and return the attached contract or if you have any questions or wish to visit more concerning this offer please do not hesitate to contact me at (940) 626-3004 or email me at kmyers@wiseec.com.

Sincerely,

Kelly Myers

Manager

Wise Service Company – Fuel

Dear Mr. Jones,

Thank you for your interest in Ferrellgas. As requested, the following Quote should provide information on the services you requested using our pricing model.

Ferrellgas would like to propose the following package for your operation

- Regularly scheduled delivery program – Our program is tailored to meet your needs and ensure you always have an adequate supply of propane on hand.
- Emergency Propane Service – 24-hour, seven days a week.
- Ferrellgas is one of the largest propane suppliers in the United States which enables your company to receive the best propane service available in the area every day of every year.

Competitive Pricing & Service

Weekly Float: Your price will be set weekly by adding a fixed operating differential to our logical daily cost of propane from the Bridgeport Service Unit that the school will be serviced out of.

Example: Bridgeport Ferrellgas service unit weekly average + \$0.37 adder making the laid in price to the school \$1.567 per gallon under current market conditions if we were servicing the school now.

All pricing is subject to change, depending on the market price of propane at the time that our LDC (logical daily cost) goes into after award. Offer valid for 10 days from day of original quote and will adjust to the current price after such date.

Thank you for your interest and we hope to hear from you soon!
