To Whom It May Concern -

I am writing you about starting a community education class to "replace" the weekend/evening AB 101 class being cancelled by CCC due to budget reasons. The classes run each Saturday and Thursday and Friday evenings. The classes are at the Oregon City campus and are well attended by folks restoring their own cars. Each class has between 15 and 20 people with one instructor. The "students" buy their own materials and bring in their own projects/cars. The only school resources used are the facilities themselves, paint masking paper and some school-owned tools (welders, etc.) The current AB 101 instructors would, I believe, be willing to teach a community ed version of the class.

As Dr. Cook and the Board (cc'd) can attest to from the budget meeting, the AB 101 classes have strong support in the community. The current student base is committed to making the class work.

I would appreciate the opportunity to discuss this further with you.

Thank you.
