Secondary Student Satisfaction Survey

An update on the Secondary Student Satisfaction Survey for 2013 will be presented. The survey is designed to identify the most poignant and pressing issues for students within our schools. Specifically, the survey instrument measures general and specific levels of satisfaction within six major categories:

- School Climate;
- Positive Relationships;
- Voice and Choice;
- Feedback and Goal Setting;
- Engaged Learning; and
- Flexible Teaching Styles.

The presentation will highlight the strengths and weaknesses within our secondary student satisfaction at Coppel ISD. In addition, it will examine the 2013 Secondary Student Satisfaction Survey in relation to the disaggregation of the 2010, 2011, 2012 and 2013 data as well as highlight strengths and weaknesses over time.
