1. General Financial

- Major Accomplishments from Last Two Year
 - Eliminated reliance on Tax Anticipation Warrants
 - Eliminated reliance on Early Taxes
 - Built Fund Balances
 - Moved Up =Financial Category from 2 of 4 to 3 of 4 (Financial Review)
- Not there yet
 - Build Fund Balances to Achieve Recognition Status
 - Obtain Additional Funding for Special Services which are all growing with a changing demographic (ML, LD, DD, ED, BD, PD, SL, OHI, 504, FRL, ECE, etc)
 - Approx 25% of the District Budget (\$5,000,000 plus) is required for Special Populations while we receive less than \$2,000,000 to fund services (less than 10% of the District Budget).
- The reasons above are exactly why we need true Fund Balances

2. District Finances State Report Card

- Evidence Based Funding Formula due to above average home values and the lower than average poverty counts in the area, the State sees the District as "less needy than others" through their calculations. The State says
 - Center Cass is at "adequacy", meaning that they believe we have enough funding to have an "average" school district, however, we collect less in total per student, which results in D66 spending dramatically less than the state average, \$4,200 less.
 - With the passage of the referendum, Center Cass' projected receipts is approaching the Local Capacity Target.
- It is important to note that the statements above are results of a simulation (model) from the State. This information comes from State School Report Card.

2. District Finances State Report Card

Expenses compare to the state (\$4,200 less than state average)

District Finances: Operating Expense Per Pupil ▼

6 of 10

Average spending per student in this district, based on financial data collected in the audited Annual Financial Report. ISBE calculates instructional spending and operational spending and divides both by the district's student count. Instructional Spending Per Student includes only the activities directly dealing with the teaching of students or the interaction between teachers and students.

Operational Spending Per Student includes nearly all costs for overall operations in this school's district, including Instructional Spending. Learn More

3. Forecasting

- What is trend data telling us:
 - Our early learners lack skills in the areas required for learning (self management, cognitive flexibility, working memory, reflection, processing, listening, etc...)
 - We have new developments being built in Woodridge and in Darien in which the Demographer predicts could increase our enrollment by 10%
 - Our new enrollment is more diverse and the gaps are wider than before.
 - After a spike in ML, Sp Ed, FRL, and other groups requiring significant services, we appear to be leveling off, however the needs inside the populations are greater, as graduating 8th graders are replaced with higher need students.
 - Math and Science scores on the rise, while cementing foundational literacy remains a challenge in the primary grades

4. Future Needs

- What does the future hold for revenue?
 - ◆ Funding for Special Populations continues to be a Focal Area for our State and National Educational Organizations and Federal Government is reducing expenses in this area, which trickles down to Districts
- What does the future hold for expense?
 - ◆ Need to Support Educational Environment with Office, Technology, Bus Drivers, and Instructional Specialists such as Coaches.
 - Need for Resources to Support Cycles of Review
 - ◆ Need to Continue to Fix What We Have
 - ◆ Need for additional space including classrooms, student work rooms for interventions, and encore learning areas, to make a strong academic push to personalize education, increase ownership, and embrace higher academic accountability.

5. Tentative Levy

- EAV is estimated to increase between 6%-8%.
- CPI is 2.9% which caps the increase, and drives the rate down
- New Property is valued between \$2.0-\$2.5 million dollar
