

## **Technology Report**

**December, 2013**

This month the Technology Department worked on the following projects:

- Worked on restoring network access to district after power outage that lasted longer than battery backups were able to maintain connectivity.
- Worked with superintendent on SchoolReach notification system to notify staff and community of delayed start because of bad weather.
- Worked on phone issues at several locations, including resetting the student phone at OMS.
- Worked with athletic director in connectivity issues at the field house.
- Worked with maintenance director with connectivity loss at Davidson Gym, which loss controls the HVAC system also.
- Working with the principals at OES in preparing data for reports for Mr. Bird.
- Worked at OES resetting Schoolview, working on connectivity on some classrooms.
- Worked at OES resetting the key swipe features on the door locks.
- Assisted testing coordinator in setting ups and delivering end of course tests online.
- Worked on copier and printer issues at each campus.
- Worked with Annette Badillo and Mari Sanchez in preparing and submitting required PEIMS data to the state.
- Worked with Annette Badillo and Janis Benson preparing contracts and reports in order to apply for Erate early next year.
- Worked with several administrators and secretaries updating and configuring their computers for compatibility for the TXEIS system.
- Repaired and reset the DMAC computer in the OHS teachers' work room.
- Continually update the school's website with job postings, etc.
- Worked on video surveillance equipment, resetting servers and updating clocks.
- Continually troubleshoot and repair computers and equipment in the district.
- We continue to support district staff and students in their technology needs.
