

Board of Education

PRESENTATION

TITLE: Student Academic Achievement – Analysis of Student Work

DATE: September 23, 2024

RESPONSIBLE ADMINISTRATOR: Dr. Tiffany Bone
Assistant Superintendent Curriculum & Instruction

BACKGROUND/CONSIDERATIONS:

Fort Smith Public Schools requested the assistance of Curriculum Management Solutions Inc, (CMSI) in conducting an audit of the district's current systems of curriculum and instruction and related curriculum management process. The purpose of this audit was to assess the current reality of the systems that support curriculum and instruction and use the information to make recommended improvements. The analysis of student work samples (artifacts) was one of the suggested areas for continuous improvement. Administrators and Instructional Specialists have been trained by CMSI to continue this work in the individual buildings. This [presentation](#) is a report on the initial collection and analysis of student artifacts. The board will receive an additional presentation to follow up on the work in January.

RECOMMENDATION:

This is a presentation item only. No action is required.
