New Portable Buildings for Buddy West and Downing Elementary Schools

- **Purpose:** Purchase of three double classroom portables for West and Downing.
- **Background Info:** Due to an increase in the student population in the western part of the county, more classroom space is required to accommodate growth at West and Downing. The new portables are a 24' x 64' double classrooms.
- **Cost:** \$340,869
- **Funding Source:** General Fund
- **Recommended Supplier/Service Provider:** Palomar Modular Buildings, LLC Ramtech was initially selected; however, their posted pricing on BuyBoard did not match their official proposal. Additionally, they could not provide us with the three portables until mid-November, whereas Palomar can have them to us this summer in time for school next year.
