

Technology Integration Goal #1

2011-2012

District Key Result
Increase student learning and expand instructional strategies by implementing technology.

Technology Integration Goal	Support data (evidence of need)
Increase the number of teachers who integrate technology to create authentic learning experiences that enhance existing curriculum or create new curriculum.	What are the gaps? <ul style="list-style-type: none"> • Staff do not know what technology should be used • Staff do not know what technology could be used • No vision • Preconceived notions of technology return on investments

Measures (what will be used to determine goal progress)	Targets (what we hope to see at the end of the process)
1. Staff and student survey	1. Survey will show improvement in technology integration.
2. Collection of exemplary uses of integrated technology	2. At least one exemplary use of integrated technology exists for each grade level at each elementary and each department at the secondary.

Strategies (what needs to be accomplished to achieve this goal)	Person(s) Responsible	Timeline
1. Support multi-facilitated professional development that encourages classroom and student use of technology for learning and 21st Century skills.	Directors of Technology and Teaching and Learning, principals, technology integration specialists, technology leadership teams	August 2012
2. Complete classroom walk-throughs to collect snapshot data on technology use in the classroom.	Directors of Technology and Teaching and Learning, principals	May 2012
3. Administer a staff and student survey	Directors of Technology and Teaching and Learning	May 2012
