

Hillsboro Junior High School

Camp Day

Before school started, we had a great camp day with our 6th graders.

We started camp with an exciting pep rally that included music and performances by the HJHS cheerleaders. They were able to get their schedules and follow their schedules in 10 minute increments. During this time, they were able to meet their teachers, other classmates, and engage in an exciting activity to introduce them to the class. They walked in timid, but left with smiles on their faces.

8th Grade Math

This is the first year students are allowed to use calculators and we are learning how to use them every day with our lessons. We are reviewing how to order real numbers on a number line, while using our new calculator skills and learning about inequalities. Students were given a set rational and irrational numbers that all needed to be converted into the same format (decimal format) so that they could order them in ascending order.

COOKING FLIN

The Junior High Life Skills class is having a great time cooking and selling burritos to our wonderful staff! Our students started by creating a menu. We then took orders from the HJHS staff and used that information to create our shopping list. Once our list was completed, we headed off to get our supplies from Wal-Mart. Our class worked hard to cook and deliver burritos to our wonderful teachers. The money earned will be used for a fall field trip.

6th Math

Mrs. Slaten and Mr. Faris had quite the competition going on in math classes! Shout out to these groups for being the winning teams of each class period to use collaboration and build the tallest tower!!

IMAGINE

Our 8th graders were excited to receive their Chromebooks from our IMAGINE grant. Our roll out went off GREAT. We were able to get all our 8th graders issued their Chromebooks within the first week. After attending training on rules and procedures for our Chromebooks and going through a Digital Citizenship course with Ms. Polley last year, we were ready to begin our school year with new and innovative ways to incorporate learning. Plus with 24/7 access, we can always stay up with what is going on in our classrooms, even at home. We have been doing a lot of our classwork on our Chromebooks and it has made learning fun and exciting.
