Good afternoon Chris,

I am emailing you today to express my displeasure with the way this covid situation is being handled. We as parents were told that the school would be going by the CDC guidelines which require only a 5 day quarantine after testing positive for covid, and not only are you still requiring a 10 day out of school quarantine for those infected, you are requiring it for the entire school system, and for what ??? A virus that has a 99% survival rate worldwide, and even higher survival rate in children under the age of 21. The damage that you are doing to these children by keeping them out of school far outweighs the risks of potential effects from this virus, just look at the numbers. Kids are not dying from this virus, but you know what they are dying from, suicides, drug overdoses, abuse, and the list goes on. These are the real problems and the all have risen exponentially since these covid shutdowns have begun. I think you need to put your personal views aside and start doing what's really best for these children and that is keeping them in school. Thank you for your time.

Gary Mills
