

Summary

August 15, 2023

AMS Schools-

AMS Schools-Arkansas has applied to establish an open-enrollment charter school beginning in the 2024-2025 academic year. The charter will follow a traditional college prep education model. AMS spoke on the history of their program and how they will serve the students of Arkansas. The intent of the school is to serve underserved populations in Arkansas. Questions from the panel included the ratio of students to counselors, class size, how math and science will be taught more aggressively than other subjects, tools used to assess the proposed population, comprehensive support plans, licensure, and enrollment goals. Applicants addressed each question and follow up questions.

The Charter Authorizing Panel unanimously voted to approve the application request.
