

Memo

To: Finance Committee
From: Sheriff Steven J. Kieliszewski
cc: Undersheriff Erik Smith; Sergeant Scott Gagnon; Treasurer Kim Ludlow; Clerk Bonnie Friedrichs, Executive Manager Tammy Bates
Date: 04/08/2020
Re: JailTracker (sic) Software

The Corrections Division at the Sheriff's Office is in need of new inmate booking software and have been working with our current records management software (RMS) provider (CORE TECHNOLOGY) for options.

In or around 2012, the Sheriff's Office switched from LEMS to CORE to provide RMS for the Deputy and Corrections Divisions. This needed to be done because LEMS was going out of business. At the time, CORE only provided RMS for law enforcement agencies but had partnered with Justice Data Solutions to provide inmate software entitled "JAMIN."

For a few years, JAMIN worked adequately for the Corrections Division. In 2017, several reports needed to be pulled from JAMIN to assist the Jail Advisory Committee with much needed data. The data was available because of the booking questions that were asked of inmates, but the reports needed to run the reports were not available. When Justice Data Solutions was contacted to see if they could pull the reports, the Committee was informed that the reports could be generated for an additional cost. Because of the short timeline and because additional costs didn't want to be incurred for reports that should have been readily available, the Committee extracted as much data as possible. Some of the reports were adequate and others were difficult to convert.

Justice Data Solutions has been difficult to work with and slow to update its software to meet the current needs of the Corrections Division. It is for these reasons that it is necessary to move to a more modern jail records management software.

CORE has partnered with "JailTracker" Jail Management Software. Information on the software is attached to this memo for your review.

It has been a goal of the Sheriff's Office to go to a paperless jail RMS. This software will accomplish that goal.

The cost for the software is \$49,528.60. The cost is based on the maximum number of inmates that can be held in jail. Currently, that number is 69. If we wait to purchase the software until after we have moved into the new Sheriff's Office, that cost will increase significantly.

We have made arrangements with our current inmate phone provider (Combined Public Communications) to pay for the software. This will be made possible by extending our current contract with them. That contract is currently under review by the Prosecutor's Office.

It is my intention to host the software locally on a server to be located in the IT Department. That server needs to be purchased and can be done so because of the sale of two generators that were obtained from the federal 1033 program. The requirements for the server have been sent to IT for their review. I'm hoping to have the type and cost of that server available for the full Board of Commissioners meeting to be held at the end of the month as well as the final review of the inmate phone contract review from the Prosecutor's Office.

Quotation/Order Form

Quote #: JT-0000825A
 Quote Date: March 26, 2020
 Expiration Date: May 31, 2020

Quote For: Sheriff Steve Kieliszewski

HARDWARE REQUIREMENTS

JailTracker Workstations		
Item	Recommended Specifications	Notes
Processor	Intel Quad-Core Processor, 2.0GHZ or better	Current-generation processor preferred
Memory	4 GB RAM Minimum	Total memory will depend on number of applications running
Hard Drive	1 GB free space, more may be required depending on size of GIS data	SATA hard drives perform better than IDE
Video	1024x768 resolution	
Network	10/100 Network adapter	
Operating System	Windows 10 Professional 32/64-bit	
Support Access	Client must provide a high-speed internet connection for support	Remote support is provided via TeamViewer over a secure connection.

JailTracker Physical Server System (on-premises solution option) 400 Bed or Greater		
Application\Interfaces Server		
Item	Recommended Specifications	Notes
Processor	Quad-Core Xeon Processors, 2.4GHZ or better	
Memory	32 GB RAM	Total memory required will depend on number of applications running on server
RAID	Hardware RAID Controller required	
Hard Drives	(4) 1 TB, 7200k rpm	(3)- RAID 5 disk set (1)- hot spare
Network	Gigabit NIC required. Teamed adapters are preferred.	
Video	1024x768	
UPS	Rack-mount 1500 VA	
Backup Device	External USB Drive	For additional database backups
Operating System	Microsoft Server 2012 Standard or Newer	Current Service Packs applied
Database Engine	Microsoft SQL Server 2012 Standard or newer	Current Service Packs applied
Support Access	Client must provide a high-speed internet connection.	Remote support provided via TeamViewer over secure connection

JailTracker Physical Server System (on-premises solution option) 399 Bed or Less		
Item	Recommended Specifications	Notes
Processor	Quad-Core Xeon Processors, 2.4GHZ or better	
Memory	16 GB RAM	Total memory required will depend on number of applications running on server
Hard Drives	(4) 500 GB in RAID 5 Configuration with Global Hot spare	(3)- RAID 5 disk set (1)- hot spare
Network	Gigabit NIC required.	
Video	1024x768	
UPS	Rack-mount 1500 VA	
Backup Device	External USB Drive	For additional database backups
Operating System	Microsoft Server 2012 Standard or Newer	Current Service Packs applied
Database Engine	Microsoft SQL Server 2012 Standard or newer	Current Service Packs applied
Support Access	Client must provide a high-speed internet connection.	Remote support provided via TeamViewer over secure connection

Ancillary Hardware		
Item	Description	Notes
Camera	Any WIA compliant camera (webcam Logitech c920) For IP based Pan Tilt Zoom Camera: Vivotek SD9161**	For imaging/mug shots
Signature Pad	Epad VP9801 or Epad2	Electronic signature capture
Scanner	Any TWAIN-compliant scanner, recommend Panasonic and Visioneer	Document Imaging
Laser Printer	Any network Laser Printer	For armbands
Barcode Scanner	Android Device version 8 or greater	Barcode Scanning/Mobile App
Driver's License Scanner	Honeywell Genesis 7580g	Driver's License scanning
<p>** This is a network camera that is POE (power over Ethernet) but if you do not have a switch that has this you will need the POE Injector (AP-GIC-010A-030)</p>		

JailTracker Modules

JailTracker Base:

- a) Inmate tracking from intake to release
- b) Unlimited number of photographs, performs mug shot lineups
- c) Graphical Population Tracker (Virtual Grease board)
- d) Dashboard
- e) Complete tracking of all booking information – with inmate’s mug shot on screen
- f) Booking Summary
 - a. Interfaces with Livescan for reduction of input information
 - b. Search warrants
 - c. Interacts with other RMS to input data automatically
 - d. Configurable booking wizards that allow system admins to create and organize booking steps from SOP’s in order to collect property, medical, etc.
 - e. Provides method to track weekenders time serve
- g) Medication Distribution – tracks all transactions and what was taken and refused
- h) Intake and Post-intake questions – ability to create own set of questions (medical, PREA)
- i) Alerts – set up alerts for medical condition, mental conditions, special diets, keep apart
- j) Visitation and Visitor Tracking – record of visitor and not allowed list
- k) Inmate Movement and tracking – printable reports shows schedule activities for inmates
- l) Inmate State Classification – state reports and forms required for state inmates
- m) Classification System – fully customizable and can be created as Yes/No decision tree or Point Value System, based on facility needs
- n) Property Inventory and Management – keeps track of any property inmate has at booking
- o) Officer Contact Information – maintain and add employee information, rights to use software
- p) Officer Training Records – maintain records, schedule training
- q) Staff Shift Assignments - assignment of staff to job – digital record for future reference.
- r) Daily Log/Shift Reports – tracks officers procedures, officers log into system and what they did, financial matters
- s) Incident Reporting – keep track of any incident and search incidents by code, officer, subject and/or witness
- t) Reports – by the hundreds and ability to create ad hoc reports. Also allow other agencies ability to log in only to this and run reports only pertaining to them.

Accounting: Complete banking system

- a) Accounts payable and receivable
- b) General ledger
- c) Commissary tracking
- d) Financial reporting
- e) GAAP-compliant
- f) Write checks to vendors
- g) Load debit cards on release

Mobile: Record inmate movements and activities with barcode scanners

- a) Automatic time, date, and user stamp on all scans
- b) Document required cell checks, headcounts and observations
- c) Records all inmate movement (rec, court, etc.)

Case Management: Extension that helps Juvenile and Transition centers manage details related to residents, parolees

- a) Manage multiple aspects of inmate from one module
- b) Track anything related to inmate case (i.e. notes, drug testing, education, employment)
- c) Manage case plans and assignments

Digital Documents: Capability to link digital documents to inmate, medical records, facility, officers and incidents

- a) Centralizing all documents
- b) Decrease costs by reducing paper
- c) Improve security of digital doc's through specific access restrictions
- d) Easily backed up for inexpensive offsite storage

Electronic Signatures: Facilities can link digital documentations to inmates, medical records, facility, officers, and incidents

- a) Reduces paper
- b) Reduces risk by maintaining signature verifications
- c) Conforms to HIPPA requirements for signature capture

AutoNotify: Invisible assistant that can notify personnel when events happen and generate reports on schedule

- a) Improves efficiency by automating recurring reporting tasks
- b) Proactively notifies key personnel when specific tasks occur
- c) Improves internal communications through proactive reporting

Scheduling: Manages and reports on inmate, facility, and officer events through a user friendly interface

- a) See inmate, facility, and officer events on one schedule
- b) Enables a high level view of events that may conflict
- c) Integrates with other modules to provide a total view of activities

Programs Interface: allows a facility to maintain registration and attendance at programs such as GED classes, staff training, or group sessions. Users can track attendance, print off certificates, and even bill for programs.

- a) Increase revenue by accurately reporting on program attendance to state and federal funding programs
- b) Manage staffing requirements to maintain classes
- c) Integrates with Scheduling module
- d) Improve internal communications through a common calendar

Web Interface:

- a) Customize website that allows the general public to view real-time details about a facility's population, including booking photographs, charges, bail-bond, and other facility-defined data
- b) Reduces the number of phone calls into facility
- c) Allows other facilities or law enforcement to produce photo lineups from any participating JailTracker facility.

CORE
TECHNOLOGY®

A DIVISION OF |  HARRIS
N. Harris Computer Corporation

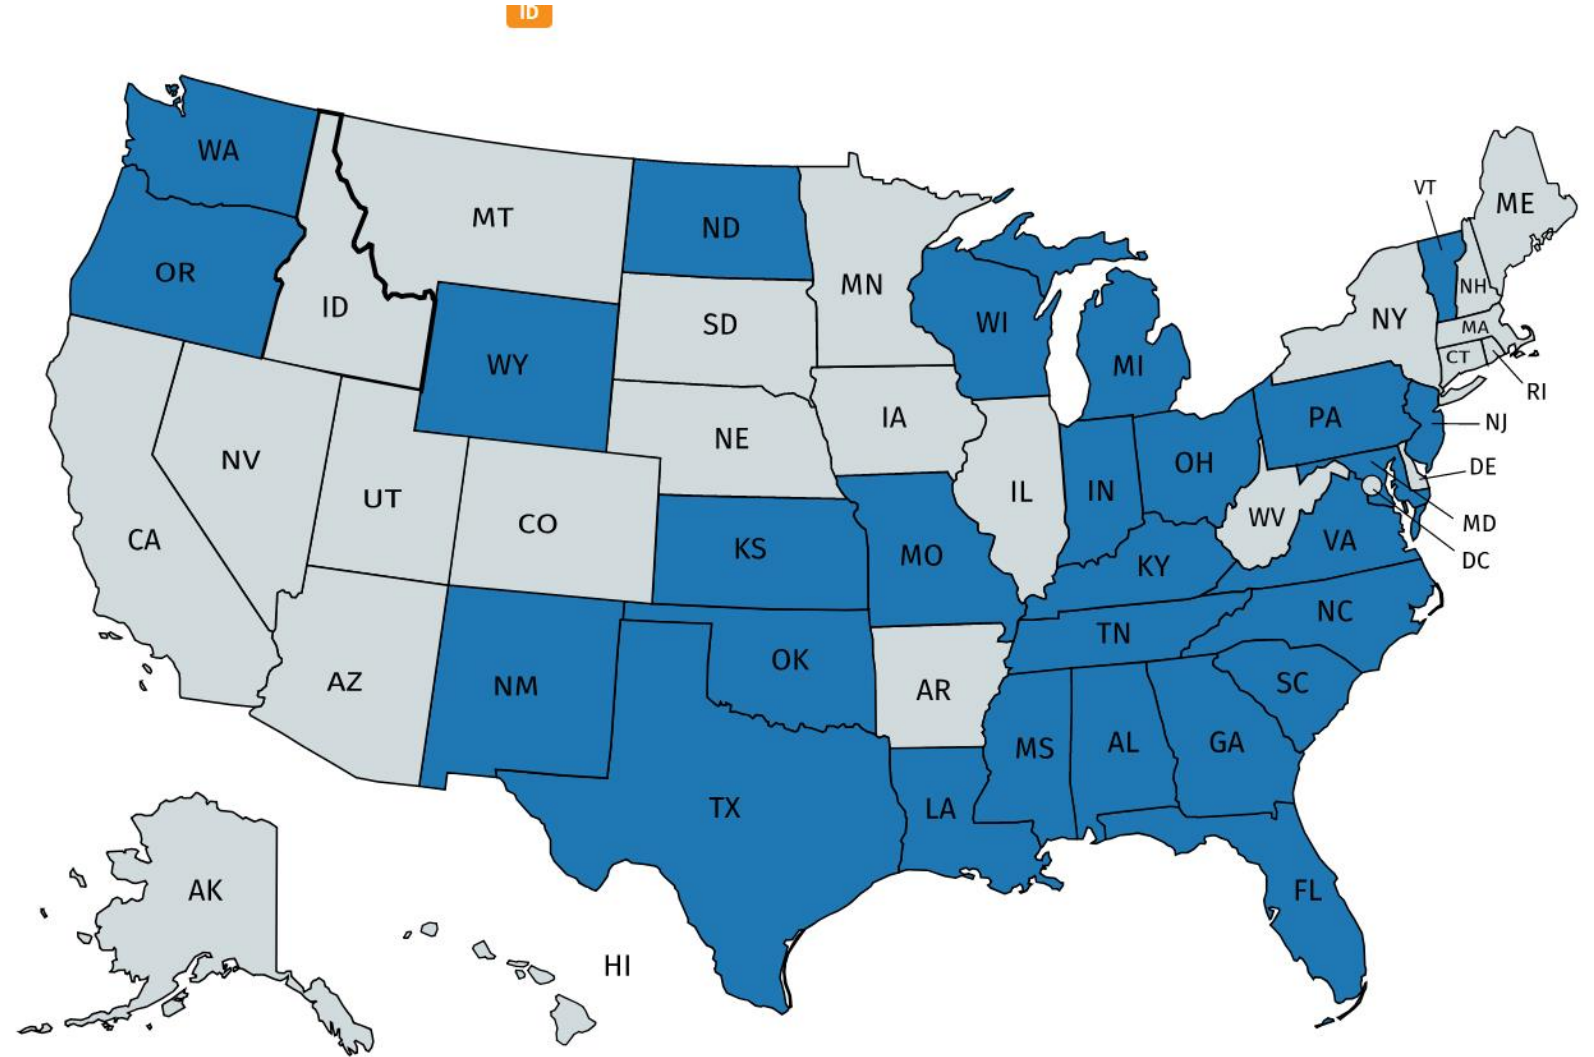

JailTracker Jail Management Software

Background Information

- Sister company to Core Technology Corporation
- 18 years in business
- Reputation for excellent support from helpdesk located in Kentucky
- Installed in over 200 facilities across over 25 states
- Scalable design and pricing to fit City, County and Statewide facilities
- Designed by Jailers
- Support staff and Project Management staff previously worked in correctional facilities
- Focus on automation to save time and improve efficiencies
- Current on technology and trends like facial recognition, e-cigarettes

200+
Facilities in
over 25
States

Michigan Counties using JailTracker

- Alcona County
- Hillsdale County
- Clare County
- Midland County
- Isabella County
- Gratiot County
- Dickinson County
- Newaygo County
- Missaukee County

JailTracker Base System

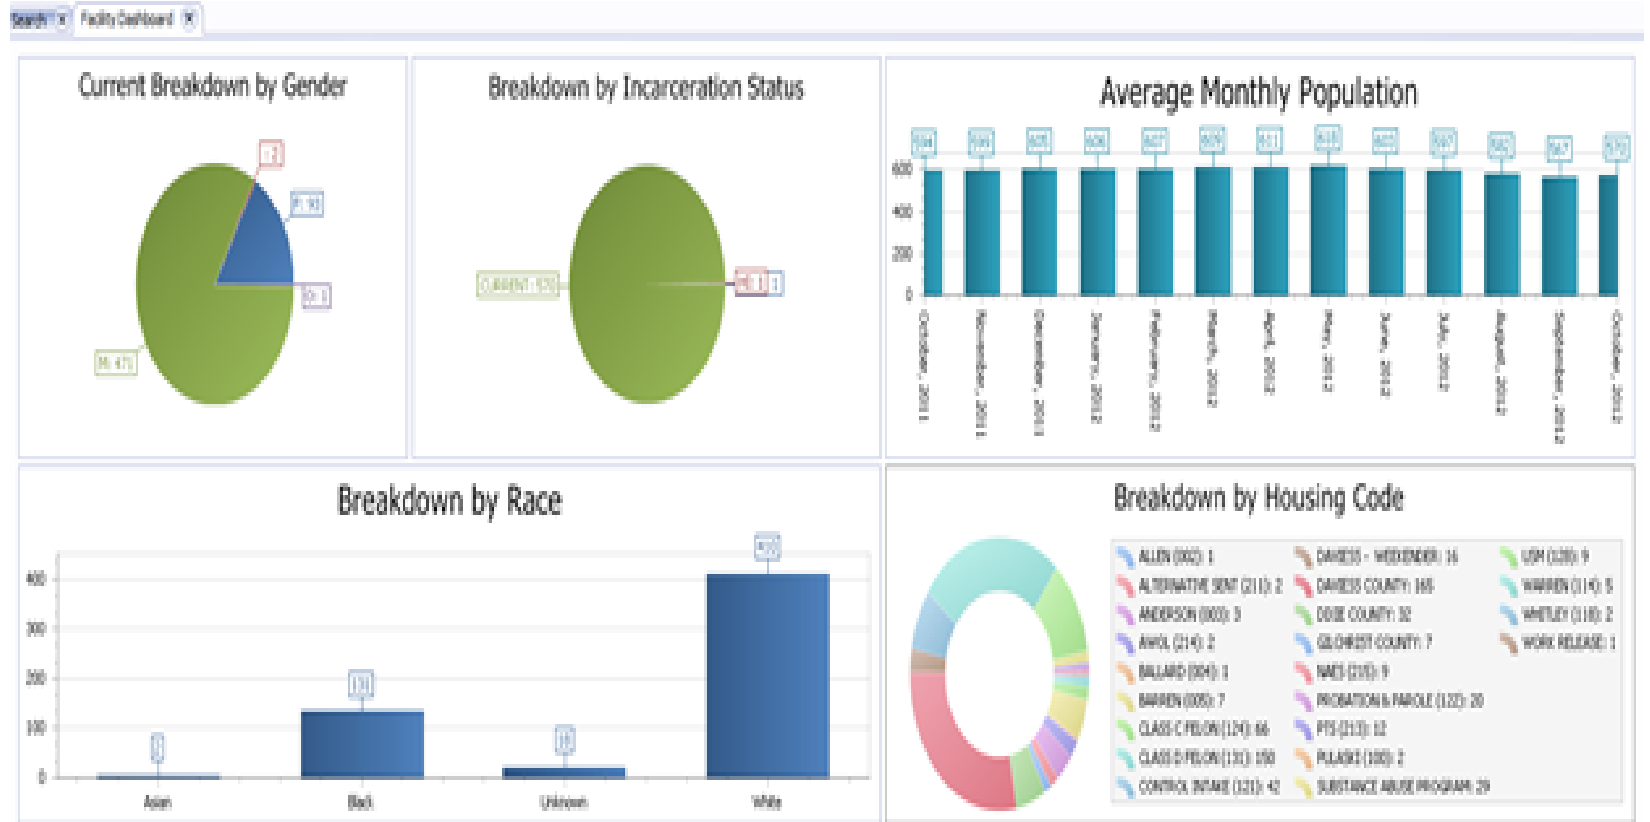

- Inmate tracking from intake to release
- Unlimited number of photographs, can perform mugshot lineups
- Virtual grease board for graphical view of inmates
- Dashboard
- Complete tracking of all booking information with inmates mugshot on each screen
- Booking Summary
 - Can interface with Livescan to reduce data entry
 - Can interface with RMS to input data automatically
 - Configurable booking wizard
- Tracks medication distribution and what was taken and refused
- Intake and post intake questions, can create your own questions (medical, PREA)
- Alerts can be setup for medical conditions, mental conditions, special diets, keep apart
- Visitation and visitor tracking – record of visitor and not allowed list

JailTracker Base System (continued)

- Inmate movement and tracking with printable reports showing scheduled activities
- Inmate state classification – state reports and forms required for state inmates
- Classification system – fully customizable and can be created as Yes/No or Points based
- Property inventory and management to track property inmate has at booking
- Officer contact information – maintain employee information, user rights, etc.
- Officer training records – maintain and schedule trainings
- Staff shift assignments – assignment of staff to job with digital record for future reference
- Daily Log/Shift Reports – tracks officers procedures, officers log what they did in system
- Incident Reporting – can keep track of any incident and search incidents by code, officer, subject and/or witness
- Reports – Over 600 canned reports and have ability to create ad hoc reports. Also can allow other agencies to log in and only run reports pertaining to them.

Dashboard

JailTracker Additional Modules

- **Base Module** – All you need to run your facility
- Accounting – GAAP compliant trust accounting
- Mobile – Mobile device for all inmate movements & cell checks
- **Scheduling** – Staff, Facility, and offender calendars
- **Programs** – Track staff and offender programs and attendance
- **Electronic Signatures** – Capture digital signatures
- Case Management – Advanced sentencing and offender case information
- **Web** – Public facing offender and facility information
- Automated Commissary – Orders through Kiosks or tablets
- Auto-Notification – Automate manually intensive tasks
- **Document Imaging** – Scan or import documents to store in JailTracker
- Facial Recognition – Identify inmate with photo during booking, release, etc.
- **Interfaces** – Can interface to numerous third party vendors such as inmate phone providers, commissary, live scan, medical, **VINE** and more.
