

## Board Report for November 10, 2014

### MAINTENANCE:

Been working on work orders and getting some done. We have had two water leaks that we have fixed. Just got done with the last home game, (woohoo). Working on dividers for Coach Livingston. I'm working on the contractor set for air compressor in Ag Shop. Working on many other things. We have been very busy.

### TRANSPORTATION:

I have BB-2 back from the shop and running strong. Bus #52 won't start, got it running but will have to go in to have an heating element replaced. Need to do some work on the VanHool. The lift on #54 is down and several safety recalls came out. I'm trying to work on it when I can. BB-1 still has problems with the fan on the A/C. Been very busy.
