

Welcome to
Tillamook WORKS

TILLAMOOK
WORKS
SCHOOL TO CAREER

Tillamook WORKS is...

- Tillamook WORKS internships connect 16-24 year old interns to careers in our community, help them build their network, and promote Tillamook as a great place to live and work.
- **These are PAID opportunities that include:**
- **Project Based Work** – a meaningful project that happens in addition to regular entry level duties. This project should be beneficial to the host site while allowing the intern to develop key skills. The best projects will result in a product or outcome that will be resume-worthy and will help the intern develop the skills that they need to have to be great employees.
- **Professional Development** – **Coming soon!** The WORKS interns will be participating in a series of Professional Development opportunities to help them build transferable skills they can use in the future. From visiting participating sites, to workshops on applying for jobs, professional communication and more, interns will learn the ins and outs of navigating professional settings.

Internships allow students the opportunity to apply specific workplace skills in a setting that best meets their career goals and interests.

Just over 70% of employers end up offering their interns full-time jobs.
