

## **Board Report Department of Technology**

**To: Mrs. Jones and the Board of Trustees**  
**Date: January 12, 2026**  
**Subject: Technology Department Board Report**

### **Technology Updates**

The computer lab for the high school has been removed, and students can now use their laptops while in the Library. The computer lab in Mrs. Marshall's class has been condensed from 25 computers to 4 computers. We will continue to monitor these changes. Door access for the high school and middle school campuses will be replaced with Verkada.

### **Technology Upgrades**

The wireless access points at the elementary campus has been replaced with Aruba 655 access points. This should allow the elementary devices to connect better to the internet. We will replace the network switches at the middle school this Summer.

### **Cybersecurity Update**

Cybersecurity remains to be of importance for all school districts. We have had no cybersecurity threats for the last 3 months.

### **E-rate Update**

E-rate funding will be allocated for the next 5-year cycle.

### **Problems and Needs**
