

STUCO Updates

This month, Student Council has been focused on preparing for Prom 2026 with our theme, "Olympic Dreams." Along with continuing to support school culture and student engagement, students have been collaborating regularly and building leadership skills through organization, communication, and teamwork as they plan one of the biggest events of the year.

Prom 2026, themed "Olympic Dreams," is designed to be a fun, memorable, and safe experience for our students. The event will feature decorations and activities inspired by the Olympics, along with music, food, and opportunities for students to celebrate together in a positive and engaging environment.

Behind the scenes, students have been working for months to bring "Olympic Dreams" to life. They are involved in designing themed decorations, managing a budget, organizing ticket sales, and coordinating all event logistics. Through this process, students gain real-world experience in responsibility, problem-solving, and teamwork.

Prom '26

Pep Assembly

Student Council recently organized and led a Hawaiian-themed pep assembly focused on building school spirit and bringing students together. The assembly featured interactive activities such as limbo and musical chairs, which encouraged high levels of student participation and energy across grade levels. We also recognized and introduced our sports team captains, as well as celebrated our State-winning FFA team. The event created a fun, engaging atmosphere and strengthened our sense of community on campus.

We raised over
\$300 to support
Challenge Day!

Spring Bash

Student Council recently hosted our Spring Bash, bringing together our school and the wider community. The event included over 15 community partners, multiple student clubs, and two food trucks, creating a fun and engaging environment for students. Spring Bash not only provided an opportunity for students to connect and enjoy campus life, but also helped strengthen relationships between our school and the local community.

Thank You!
